

Health and Nutrition Advisor Central African Republic

Save the Children is the world's leading independent organisation for children. We work in 120 countries. We save children's lives; we fight for their rights; we help them fulfil their potential.

We work together, with our partners, to inspire breakthroughs in the way the world treats children and to achieve immediate and lasting change in their lives.

We have over two million supporters worldwide and raised 1.9 billion dollars last year to reach more children than ever before, through programmes in health, nutrition, education, protection and child rights, also in times of humanitarian crises.

Following a major transition, our international programmes are now delivered through a merged operation with c15,000 staff, managed through seven regional hubs and reporting to a relatively small, central office. We're changing to become more efficient, more aligned, a better partner, a stronger advocate, a magnet for world-class people and relevant for the 21st century.

Contract length: 12 months

The role

The Health and Nutrition Advisor Health technically manages the health / Nutrition programme of Save the Children in CAR, under the supervision of the Director of Program Development and Quality.

His responsibilities include overseeing the evaluations, updating and implementation of sectoral strategy for health and nutrition, technical supervision of the programme and staff, developing proposals, and reports writing.

His responsibilities also include the representation of Save the Children at the national level for high-level coordination with government and other partners, including advocacy for universal access to health care and health system strengthening.

As health and nutrition intervention is integrated into a multi-sectoral approach with HIV, protection, and education, the Health and Nutrition Adviser in coordination ensures the integration of project activities with the relevant sectors.

Qualifications and experience

Essential

- Medical Doctor with strong skills in Public Health
- At least 5 years of professional experience in health programme management during humanitarian crises
- Field experience with International NGO is essential
- Proven experience in project proposal writing
